

# EXECUTIVE SUMMARY

v 1.0

## OVERVIEW

---

Master Ventures is a leading investment and acceleration firm, catalysing the next wave of disruptive technologies looking to improve or replace overly centralized systems.

Comprising of a hedge fund and an acceleratory arm, Master Ventures offers a full suite of services to innovative and pioneering blockchain and DLT (Distributed Ledger Technology) projects. The company boasts a diversified investment portfolio of emerging technologies companies, and is executing on several high profile advisory contracts.

## CAPITAL

---

Master Capital is a hedge fund that invests in highly disruptive blockchain solutions, tokenized and securitized assets. Master Capital 'tokenizes' the real sector of the economy, deploying capital towards early stage projects and all Master Accelerator companies.

Master Capital is in the process of structuring and initiating its first outside capital raise, as a means to expand size, increase scale and optimize synergy across its investment portfolio of disruptive blockchain companies and ecosystems.

## ACCELERATOR

---

Building upon its existing portfolio, Master Ventures is expanding to become a leading accelerator for emerging technology companies. Contributing its own investments, Master Ventures includes advisory compensation contracts, along with digital token assets to seed the first fund (or offering).

Master Accelerator will align the economic incentives of value-adding, disruptive global blockchain technology firms, platforms and tokens by structuring and offering pooled investment vehicles (PIVs), as transparent capital vehicles for pooling capital. This will maintain liquidity for investors and encourage collaboration and sharing of resources across the portfolio companies.

## PRE-FUNDING ASSISTANCE

---

- Creation of Investor Facing Material (Whitepaper, Pitch deck, One-Pager, website)

- Global Business Development

## THE MASTER VENTURES TEAM

---

The team behind Master Ventures has extensive experience across a range of sectors including venture capital, law, business development, software engineering, marketing and token economics. With a combined 20+ years of working knowledge within the blockchain space, the Master Ventures team are at the forefront of emerging technology and look to become a driving force behind the decentralization of existing models.

## PARTNERSHIPS

---

Master Ventures has partnered with leading service providers within the blockchain space that can assist in all aspects of project acceleration from software development to client acquisition, meaning a top tier service delivery to incubated projects.
